SKILLS

Languages : JavaScript, TypeScript, HTML/CSS, C++ (OOPs and Data Structures)

Frameworks/Libraries : React.js, Next.js, Tailwind CSS

Tools : GIT, Github, Visual Studio Code,

WORK EXPERIENCE

Frontend Developer

PSup

WFH

Jul - Sep 2023

- **Integrated the front-end with the APIs**, and added **reusable code** for future use, using **Next.js**
- Understood the workflow in agile environment and worked with associated technologies to deliver high-quality code

Full Stack Developer

Freelance Work

Remote

Mar - Jun 2023

- Developed **robust back-end architecture** for seamless transactions, user authentication, and database management.
- Integrated **secure payment gateways** and added CRUD operations with the help of firebase, using **Flutter**

PROJECTS

House-Renting

A web app to get/give house on rent

Github

06/2024

- Designed and implemented **the front-end using React.js**, creating a user-friendly interface for property listings, search, and filtering options.
- Built a scalable and efficient back-end using Node.js and Express.js, handling user authentication, property management, and rental transactions. Conducted testing and debugging to ensure application reliability and performance.
- Ensured responsive design for optimal user experience across various devices and screen sizes.

Restaurant Management System

A web app to book table and order in a restaurant

Github

05/2023

- Designed and implemented the front-end using React.js, providing an intuitive user interface for table booking, menu browsing, and online ordering
- Ensured **responsive design** for seamless user experience across different devices and screen sizes. Deployed the application on cloud platforms (e.g., AWS, Heroku) for scalability and accessibility.

Simon Game

Recall and replicate sequences of colors and sounds.

Github

12/2022

- Designed and implemented the game interface using HTML5, CSS3, and JavaScript, ensuring a responsive and engaging user experience.
- Created game logic to generate random sequences and track user input, providing feedback on responses.

To-do-list

to-do list application to facilitate efficient task management

Github

01/2023

- Developed a **RESTful API** with Express.js to handle task management, user authentication, and CRUD operations
- Successfully launched the application, facilitating better task management for users. Improved user productivity by providing a simple yet effective tool for daily task tracking.
